## THE BRIDGE

### Linking Practitioners of German Biological Medicine

Volume 13, Issues #10, October 2017

Tuesday, 17 October 2017

Dear Colleagues, Friends and Supporters of OIRF,

#### 👉 Welcome to Volume 13, Issue #10 of "The Bridge" newsletter!

I know, I know! What happened to Issue #9? Between the move (argh – will it ever end??!!), participation in the big St. Louis conference and preparation for the Germany Tour, I just didn't quite get everything done. But I will make it up to you.

Note that Carolyn's last day in the office before Germany will be this Thursday (the 19th) and she departs for the land of Germany Tour #44, *Oktoberfest* and *Neuerwein* on Saturday morning. She will officially be back into the office on Monday, November 6, 2017. In the interim Elaine will keep the OIRF offices open during our regular business hours, and will be here to answer your phone calls and emails, and to handle your orders. Please see our [Contact Page](#) on the website for full details of our new location address.

Watch for Issues #9 & #11 later in November and of course the Christmas/ New Years Issue #12 in mid-December. We have articles promised from OIRF Advisors **Dr. Robert Cass** (regarding EAV type assessment techniques and natural remedies) and **Dr. Dan Beilin** (regarding the benefits and application of regulation thermography). As well, I've found an excellent article on Chemtrails in one of my German journals that I will get translated and published for one of those issues. We appreciate your patience with the delays.

Welcome to this October Issue #10 of "The Bridge" for 2017. In this Issue I have included an excellent article from our OIRF Advisor, **Marguerite Lane, ND**. This article entitled "*Strategies for Using Classical BioResonance*" gives us some practical applications of energy medicine using MORA. Great thanks to her for an exceptional (and early) article submission!

➡ Please see the 2017 Events Calendar on Page 18 of this Issue and also on the [Events Page](#) of our website where you will find the current conference listings. Watch for announcements of several other conferences and seminars where you will find OIRF in an education or exhibit booth. Events for 2018 are beginning to be announced and we look forward to participating in many of them!

➡ This is a reminder notice regarding the [OIRF Germany Tour #44](#) which takes place October 26 through November 1, 2017. Deadlines for this program are past and all registrations are closed. There is a small but elite group of practitioners participating in this Tour program as well as many lectures and exhibits at the world famous Baden-Baden *Medizinische Woche* Congress.

You can follow our daily activities, adventures and travels through the beautiful Black Forest of Germany at our [Itinerary 2017](#) link.

## **Strategies for Using Classical BioResonance**

By Marguerite Lane, ND

© Copyright 2017, Marguerite Lane, ND, Gordon, NSW, Australia

One thing I love about working with the MORA is the fact that I can think like a Western medicine-trained therapist, that is, in terms of anatomy, physiology, pathogens and toxins. In addition, I can enhance that thinking with any knowledge of homeopathy and acupuncture I may have.

I know there are many therapists who stick with the 40-point testing and treatment, which is based on the acupuncture meridians. I use that approach when needed, but most of the time I don't have to use it. I can work the way that seems most natural to me.

Of course we can combine the various systems of testing and treatment, because this is the world of energy medicine, and energy doesn't differentiate between our medical systems. That which resonates is what we can use. If a remedy (or group of remedies) resonates with the client, then their body knows how to make use of those energy patterns.

With these thoughts in mind, I'd like to describe my favorite strategies for testing and treating clients with acute and chronic problems. I will give an example of each.

### **Acute – Food Poisoning and Jet Lag**

The client had just returned from an overseas trip the day I saw her. She's a 43 year old mother of three. She presented with strong nausea and a bilateral temporal headache, which came on immediately after lunch.

#### **Testing**

I started by searching for the Salmonella and Shigella nosodes. I use the single-point testing method, so I tested each nosode on the large intestine point. I like to use this point because it's on the index finger, so it's easy to reach. It's also a very responsive point.

Both Salmonella and Shigella tested as "yes" (giving the low sound), so I marked them.

I thought that perhaps the headache was related to jet lag, so I then went to one of my homeopathic remedy test sets to test jet lag remedies. The ones that tested positive were Lycopodium, Arnica, Bellis perennis, Chamomilla, and Ipecac.

#### **Treatments**

Program 78 – ELH Lycopodium, Arnica, Bellis perennis, Chamomilla, ipecac – all at 30K potency

Program 77 – ELH salmonella nosodes

Her nausea began to improve, but the headache persisted, so I changed tact.

#### **Further testing and treatment**

The headache was in the region of the gallbladder meridian, so I tested the 40 ting points. The ST ting point on the left side gave a dropping indicator. When I put a vial of Salmonella nosode at D30 potency on the input, the ST ting point went into balance.

Then I ran the Energy Circulation “–ose” treatment for the Stomach meridian, placing the D30 Salmonella nosode on the input. When the treatment finished I asked her to drink some water.

The headache went away. The nausea was also gone.

I made a bottle of support drops with the jet lag remedies (30K) and Salmonella/Shigella nosodes (D4) for her to take if any nausea or headache returned. The symptoms did not return.

#### **Chronic – Restless Legs**

The client is a 55 year old woman whose legs had not been able to relax for 30 years. She had to get up several times every night and pound her thighs with her fists, and stamp her feet on the floor. She said that she had to do this to “get the circulation going again”. If she tried to sit still during the day, her legs were never able to relax. She had to keep them moving at all times.

It all started on her honeymoon in the Bahamas, when she was stung by mosquitos. She became extremely sleepy and weak. At the time, doctors were unable to give her any diagnosis, so she lived her life as best she could. She recounted fainting if she had to stand in a queue, and collapsing after attending a course. Although she eventually regained her strength, her legs were restless since that time.

### **Testing**

The symptoms sounded like a job for homeopathic Rhus tox, but that remedy did not resonate. I knew I had to go deeper, so I tested the nerves of the legs, in particular, the Sciatic, Femoral, Tibial, and Peroneal, at all the potencies available in Test Set “W”. Whenever I got a “yes” answer (i.e., the low sound, when testing the LI ting point), I put the organ preparation into the honeycomb.

With my tested collection of organ preps at various potencies in the honeycomb, I activated the honeycomb and began testing vials of nosodes against it. This procedure is sometimes called the Correlation Test, or Filtering.

#### **How to understand the Correlation Test**

If you put just the organ preps in the honeycomb and test, you will get a low sound, indicating that the body wants these vibrations and is taking them in. When a nosode correlates with the organ preps in the honeycomb, the MORA gives a high sound. This is because the nosode balances out the organ preps, so the body is saying that if it receives the nosode, it doesn't need the organ preps.

This concept is often difficult for new practitioners to grasp, so I give this analogy:

If your favourite food is chocolate, but I don't have chocolate to give you, you might settle for carob. So there you are enjoying the carob (which corresponds to the organ preps in this analogy). But if I then find some chocolate (ie, the nosodes – the underlying problem) and give it to you, you will gladly take it and no longer be interested in carob.

In other words, the body will settle for the organ preps to support the organs. But if the underlying cause is found (nosodes), the organs will be brought into balance and need nothing more. So the high sound is returned.

The viruses that usually get into nerves are those from the Herpes family, including CMV, EBV, Herpes zoster, and all other other Herpes strains. I also test Mycoplasma, Ross River Virus (an Australian virus similar to West Nile Virus), Borrelia, Babesia, Bartonella, Dengue and similar tropical illnesses, as well as the nosodes for Streptococcus.

### **Treatments**

With this client, I began a series of treatments over a few months. During each session I tested the organ preps of the nerves of the legs to find the ones that resonated (=low

sound), then, with the organ preps in the honeycomb, I tested nosodes at various potencies against them (resonance = high sound). Each time she returned, the potencies of the nosodes which resonated decreased. The treatments were similar each time:

1. Point therapy, A mode, administered to the NS ting point<sup>(1)</sup> on each index finger for approximately 8 pulses.  
Input:
  - low potency of all heavy metals (mercury, lead, cadmium, aluminium, palladium, beryllium, nickel)
  - drainage remedies for nerves (Cocculus, Zincum cyanatum, Zincum valerianicum),
  - the nosodes and the organ preps, as tested
  - plus a potency of Streptococcus nosode, as tested.
2. Program 78 – various drainage remedies which resonated after the point therapy had been administered, always including at least one immune system remedy, such as Echinacea compositum, plus remedies to support the liver, kidneys and lymph system. This program acts to bring all the meridians into balance.

I saw her every 2-4 weeks. When treating this way, I have found that if we wait longer than 4 weeks for the next treatment, the viruses will return to their previous potencies, so we waste time and effort.

- After the first treatment, she no longer needed to get out of bed at night to punch her legs and stomp her feet, but her legs still did not ever feel totally relaxed.
- After 3 treatments she was able to take a flight to the US and return without having to walk up and down the aisle of the plane for the 15 hour trip each way.
- After 7 treatments, her legs were completely normal and have remained so for the past 8 months.

## Discussion

I have used a similar point therapy approach with many clients. It seems that what is happening is that the viruses are residing in the joint, nerve, or other body structure. When we give point therapy with the heavy metal antidotes, the organ-specific drainage remedies, the nosodes and organ preps, it is like saying to the tissues:

*“Hey, I’m talking to you! (organs) Here’s what’s bothering you (nosodes), and here’s how to get rid of it (drainage remedies).”*

Then the body takes the instructions and begins expelling the viruses, strep and heavy metals from the organs being targeted by the point therapy treatment. The intercellular immune system does as much as it can to neutralize the microbes, and the channels of elimination remove the debris.

Please note that the entire amount of the viruses is not removed in one treatment. We must rely on the body's wisdom to decide how much of the virus to expel after each treatment. Therefore, the client must return for follow up treatments until the organ preps no longer resonate. When the organ preps do not resonate, the body is telling us that it has matters under control and no further instructions from us are necessary.

The great thing about this type of treatment is the quick relief the client gets. Within 2 days their symptoms are noticeably improved. Be sure to let them know that if they wait more than 4 weeks to return for the next treatment, they may feel their symptoms begin to return. After the organ preps no longer resonate, the symptoms don't return.

(1) It's best to administer point therapy to the most relevant ting point. So for example, if the organ preps that resonated were the colon and ileum, I would use LI1 and SI1.

## **The FIT 915 from Medical Electronics**

### **Light: Scientific research results confirm the importance of correct light conditions**

#### **Healthy with light**

The correct light at the right time; this leads to an outstanding potential of until now unused possibilities in energetic regeneration. Discoveries in the areas of photo-biology and chrono-biology reveal new and easy to use technologies within a wide ranging spectrum with effective application of light in a bio-energetic therapy.

**Light:** a phenomenon which has occupied human beings since ancient times. It is only now that we understand the enormity of the biological processes which are connected to this energy but which are still not fully understood. Only slowly is natural science recognizing how extremely important the interaction between biological processes in our bodies and the existence of the correct amount of light together with the correct spectrum range at the right time. In nature nearly all biological processes are synchronized by the light-dark phases of the natural sunlight.

#### **White light, an important contributor to our health**

##### **Healthy and fit with correct light**

Is it possible to be put into a good mood and feel fit by pressing a button? Most probably! Our mood and health are primarily controlled by hormones. These hormones are mainly controlled by light which we absorb with our eyes. This knowledge opens up untold new possibilities to positively influence the body. New technology is making this possible now.

Astonishing results based on the study of light are gaining more and more importance. The natural science branch involved in researching this field is called chronobiology. Practical understanding in this field teaches us about the significance of the correct light at the right time. Important hormones for our health and well being are endorphins, dopamine and serotonin which are controlled by light. Their existence is the immediate reaction to the absorption of natural light or light with equal physical properties. The intensity and the spectrum play an important role. A specially important part of the daylight spectrum is the large proportion of blue light (450-480 nm).

#### **Red light regenerates and repairs holistically**

##### **Optimal wave length for holistic regeneration of all eye functions.**

Scientific studies confirm that red light with a wave length of 630 nm offers maximum benefits for tissue regeneration. This wave length is also preferably used in photobiology to stimulate holistic body healing effects. Maximum depth penetration and optimal absorption guarantees the best possible treatment results, even in deeper skin tissue. This ensures that the eye itself and all linked supply systems are benefitting from the healing energy of the photons.

#### **The brain needs the information provided by light to be able to cope with numerous tasks**

The light absorbed by our eyes is used by the brain for various tasks. Only about 15% of the light which the eyes absorb is used for orientation purposes. The remaining 85% are used in various parts of the brain. Circulation, metabolism, blood pressure, hormones and a whole range of other important functions are directly or indirectly dependent on the light absorbed by the eyes.

**Sunlight is variable and continually changes its brightness and color combination**

Starting at sunrise and through to sunset the sunlight spectrum arriving on the earth's surface is constantly changing. Since the beginning of time this dynamic light has nurtured all life on this earth. All living organisms have adjusted to this natural biologic rhythm and accepted it as the pacemaker for their inner life rhythm. Accordingly the hormone production is adjusted to the relevant time in the day because of the dynamic of light. Control of the complete hormonal balance can be lost if this dynamic is missing (night work/shift work).

**Artificial light sources create biologically unfavorable light**

Living areas and work places which are illuminated by artificial light sources induce a raft of problems of the inner synchronization to the outside world. Important wave lengths are missing in this light and it has a permanent unnatural color combination and brightness. The light flickers with toxic frequencies and transfers by plasma discharges of mercury gas corresponding spectral information via the eyes to our brain. Over time this can have disastrous consequences for our health.

**Modern Technology offers a solution**

Due to new developments in producing light we now have light sources (LED) with extreme brightness and an ideal spectrum at our disposal. With the modern high intensity LEDs it is now possible to produce light which is utilized by our organism like natural sunlight. The development of the light unit **FIT 915** fulfils all requirements which our organism needs from natural light.

The solution is the **FIT 915**

**Intensive white radiation 9,000-14,000 lux wavelength 400-700 nm**

**Intensive red light radiation 12,000-20,000 mc (12,000-20,000 lux) wavelength 630 nm**

**Carolyn's Comments:** In recent years we have watched some of our top rank Naturopaths going back to the books to prepare for the dreaded "prescribing exam". Personally I wonder about why our NDs are being trained and examined to prescribe (allopathic) medications when as Naturopaths they would normally "prescribe" homeopathics, supplements, herbs, etc. On the other side of the coin we are seeing our homeopathics and natural remedies being taken off the market by Health Canada and the US FDA. Where can we now turn for remedies for our patients? Note that Sanum, Heel and other North American "discontinued" remedy companies are definitely licensed and included in the software above . . .

## A Special Report

# The Ground Regulation System (GRS)

By o. Univ.Prof. Dr.rer.nat. med.habil. Hartmut Heine †

A few years after his serious illness in 2011 **Prof. Dr. Hartmut Heine** published a series of seven articles on the **Ground Regulation System**. I [*Carolyn Winsor*] was honored to be able to translate this incredible research into English for the first time and to publish it in our newsletter, "The Bridge".

As I worked my way through translation of the first article, the wealth of knowledge and understanding imparted in even that introductory article left me scrambling for dictionaries, research documents hidden away in the old OIRF library and way beyond "Google searches" to make sure that I was doing justice to the information Prof. Dr. Heine was imparting. Combined with the succeeding six further articles, his gift to us of knowledge and of understanding is truly priceless.

In respect for Prof. Heine I have merged those seven articles into one single report and have republished it separate from that older newsletter. With a total of 48 (mind-blowing) pages, this work is not just "worthwhile" reading, but mandatory reading for all practitioners of orthodox and complementary medicine. Available in electronic or print format for \$30, here is an outline of the contents:

- Part 1** – The Ground Regulation [A History and Background]
- Part 2** – GRS as a non-linear system – Structure, function and determined chaos
- Part 3** – GRS as a non-linear system– Structural components of the extracellular matrix (ECM)
- Part 4** – Spatial structure of the ECM and material transport within the system
- Part 5** – Contact, limitation and clogging up: Cell adhesion, basal membrane and glycosylation
- Part 6** – Functional relations of the ground regulation with the central nervous system
- Part 7** – The Ground Regulation and the Circadian Rhythm
  - The Ground Regulation and Alzheimer Dementia

### **"EXTENSION TRAINING" PROGRAM IN MODERN & TRADITIONAL ACUPUNCTURE**

Over twelve hundred pages of printed materials incorporating applicable materials from the supplementary textbook ([An Outline of Chinese Acupuncture](#)) and set of four charts (by [China Cultural Corp.](#)). Program starts off assuming you know nothing about acupuncture (a good place to start even if only as a thorough review of the basics) and takes you right through to the most heavy-duty advanced aspects of true, 'energetical' acupuncture. The finest and most comprehensive material in the English language, covers all seventy-one meridians of traditional acupuncture; that 'missing sixty percent' of acupuncture knowledge most "acupuncturists" have never even heard of; and, the modern electronic 'needle-less' treatment methods (Electro-Acupoint Therapy) now so popular.

Over 3,000 students were originally enrolled in this famous Extension Training Program, and the OICS graduate listings read like a "Who's Who of Acupuncture" in the English speaking world. This program takes you as far as anyone possibly can in a 'written' format prior to the clinical finesse and practicum needed to round out your acupuncture study to professional levels.

#### **FULL THIRTY-THREE LESSON PROGRAM NOW AVAILABLE ON DVD**

**Price includes** disc with all 33 Lessons, applicable supplementary textbook (An Outline of Chinese Acupuncture) passages and representation of set of acupuncture charts (China Cultural Corporation set of four). [Current editions of the textbook and charts can be easily obtained from suppliers of acupuncture books and supplies.] Price does **not** include printed materials, binders; or, any tutorial, examination, or certification privileges. ## Neural Therapy Workshops

### Hands on Training

#### Neural Therapy is the most effective and unexplored tool of healing

Neural Therapy (NT) is practiced by a very limited number of medical practitioners in North America, but is well known and accepted in German and Spanish speaking countries. It is a regulation form of therapy, akin to acupuncture or homeopathy. It is accomplished primarily by the use of injections with local anesthetics, like procaine. It is effective as a treatment by itself, or synergistically to enhance other treatment modalities.

Its effectiveness is explained through the mechanism of regulating the autonomic nervous system and control of the matrix cell milieu, which is at the core of all our internal functions. It is valuable in a majority of medical and psychological conditions. Simple injections in the areas of skin and scars, or more complicated injections in the ANS ganglia can help to resolve conditions resistant to all other treatments.

It is very effective in chronic pain, hormonal irregularities, digestive disorders, psychiatric conditions and many other issues.

Our workshops will be unique in several aspects. Our faculty consists of the most advanced NT European practitioners, assisted by experienced US physicians. They will combine theoretical with practical hands on experience. The main goal is to empower medical practitioners to implement their skills on Monday morning following the workshop.

NT is not recognized by any medical insurance, which is an advantage. It allows you to charge patients a fee according to your comfort and skill level. Most patients are willing to pay as it provides them with a cure that they have been looking for.

1. For beginners there will be three workshops guided by **David Vinyes, MD** from Spain. David is a unique full time practitioner of NT, who teaches NT in college and is sought after as a speaker all over the world. The first workshop held December 1-3, 2017, will be the best for those who have no practical knowledge of NT, or who may have learned through observation but are not quite ready to make the transition to use it in daily practice. This hands-on workshop in a friendly, supportive environment should be very helpful. The course will have three segments taught in 2017-2018.
2. The second series of workshops are designed for those who have been practicing NT, but have never learned hands on, are afraid to do deep injections, or need to hone their skills in NT and learn the secrets of German Biological Medicine. Participants will learn ganglia, joint injections, use of homeopathy, dental correlations and the best ways to find what and how to inject. A significant part of the course will be devoted to learning multiple aspects of German Biological Medicine. The course will be taught by **Ralf Oettmeier, MD**. He is a German educated physician who is currently a leading physician in Paracelsus Clinic, Switzerland. Ralf has an encyclopedic knowledge of German Biological Medicine and NT. Few practitioners in the US have had the chance to learn the intricacies of German Biological Medicine, one of the most advanced forms of diagnosis and healing. The first workshop in this series will start on November 17-19, 2017. This workshop will have five segments taught in 2017-2018.

The fee for each workshop is \$900.

These workshops are recommended for all medical practitioners whose licensure allows them to do injections: MD, DO, ND, PA, NP, DDS and DMD.
